A space suite, ninja nesting dolls and a personal submarine are among the 10 coolest things in the world this week.

## Space Suite

Star photographer Michael Najjar has designed a unique hotel room at the Kameha Grand Zürich; one moonlighting as a space station. Furnishings include a "floating" double bed with black mattress, hovering astronauts and models of rockets. A steam bath seems to look down onto Earth, while black galaxies dust the white walls and ceiling. Exquisite.
